1 September 1943

Dear Pease,

Perhaps your letter was written before the question of putting the kennels in the field we visited was settled, as I understand it has been, by the management of the Animal Nutrition Institute. My letter to you was solely to ascertain whether you or this Committee would object if the North East end of the field were chosen rather than the South West. This was perhaps an unnecessary courtesy, as I am sure the kennels could be placed in either portion so as to inconvenience nobody. We should, however, want to know soon if your Department requires access to, or passage through, any part of the field, so as to place the enclosing fence conveniently.

Yours sincerely,
