22 April 1943

Dear Fraser Roberts,

I am returning the draft letter for *Nature* with a number of suggestions, mostly trifles though I should stop on page 5 and not enlarge what is already a whale of a letter by what is bound to be a very inadequate and tentative discussion of the possible causes. This also enables us to end on a rather firmer note. Anyhow, look through it and see how you like its form as I have left it, remembering that if we could shorten it further, it would be all to the good.

Yours sincerely,
