Dear Sir,

Some four years ago you were kind enough to allow me access to the records of triplet cases preserved in the accounts of His Majesty's Privy Purse. I enclose herewith a reprint of a paper on the subject from the Proceedings of the Royal Society.

On the last occasion you were so good as to invite me, if further data were required, to come back for more. In respect of measurements I think I have done enough to make the position clear, but my relationship data still looks a little scanty for the conclusions I am inclined to draw from it, and I should like to increase it. The records for births in the years 1921-27 are still untouched, and if I might make another visit for the purpose, I could extract them in about five days work. As before I should come with a typist, but should wish to consult your convenience as to dates and times.

Yours sincerely,
