26th February, 1957.

Dear Keith,

I have not in my files any record of having refereed the paper by Clegg, Deutsch, and Griffiths in the Philosophical Magazine, Volume 50, page 419, on "Rock Magnetism in India". A reasonable reference to Irving's work seems to be that on page 420, "Its advantages ... Deccan Trap area". I suppose Blackett drew your attention to this passage, and it does contain very much what I might have thought proper to suggest if I were consulted, but it seems I could only have done so orally, and indeed it might have been indirectly through someone else such as, perhaps, Bullard.

Sincerely yours,
