Dr. Slater,
The Maudsley Hospital,
Denmark Hill,
S.E.5.

Dear Dr. Slater,

Dr. Lewis has sent me your paper on the Incidence of Mental Disorder, which I have read with interest and think would be entirely suitable for the second number of the Annals of Eugenics, which I expect to be published in January. I have noted in the margin a few queries which may be helpful to you in putting it into its final form. Apart from the question of occupational classification, they do not involve anything which looks like work.

Yours sincerely,
