Dear Thomson,

Many thanks for sending me your Analysis of performance test scores of a representative group of Scottish children. I have not yet been able to read it, but I shall do so with interest, and am certainly very glad to have it for the Library.

Yours sincerely,

R. A. F.}

[Handwritten note:]

In the first paragraph you will notice a misprint on page 31 where the factor (1 - 0.7260) ought of course to multiply the whole fraction. The result .003594 is correct. Also on page 30 by 3 is different in boys and girls as well as by and by.

This economy in paper is my endeavor to make up for the lavish supply of yellow or blank pages by the firm. I wonder less in the book!

Yours sincerely,

26.7.40.
