24 October 1934.

C. Todd, Esq., F.R.S.,
Institute for Medical Research,
Hampstead, N.W. 3.

My dear Todd,

Many thanks for your letter. As you know pretty well what sort of research I have in mind and what facilities I can give here, I wonder if you could tell me what you think of G.L. Taylor for the post. His friends recommend him highly and think that he will be attractive, and his papers seem to be sound and painstaking, if not very imaginative.

If you are thinking of occupation or amusement subsequent to retirement do please consider whether I could not supply what you would want in the way of a local habitation at the Galton Laboratory. I should really be delighted if you found it convenient to come here sometimes, perhaps regularly, but, in any case, enough to be in touch with what is going on.

Yours sincerely,
