28th January, 1939.

Dear Todd,

Here is my reaction to the data now obtained from Hill. I think a final section headed "Inhaling" may serve the purpose. Probably a list of references should be the final entry. They have, I think, all been given in the Letters to Nature and the B.M.J., apart from the material used in this pamphlet itself.

The whole thing cannot be very tidy, and is scarcely meant to be more than ephemeral. It will gain by not being too long. Perhaps, if you approve, you will transmit this to Oliver and Boyd. 

Sincerely yours,

Enc.

G. F. Todd, Esq., O.B.E., M.A.
