29th September, 1958.

My dear Todd,

Many thanks for sending me so quickly the result of the Committee's meeting. It is really a very great encouragement. Of course, estimates of cost at an early stage cannot be very exact, and I wanted to propose a figure within which we could hope to work with reasonable probability, regarding it as an inclusive grant. I am anxious to avoid the considerable expense that can be incurred by the employment of electronic computers and mechanical tabulating equipment, and to get, on the contrary, some available remuneration to sweeten the lives of those who are actually responsible for the technical competence of the work. However, I have written to Burton, and expect to hear from him and Habinon as their discussions make progress.

Sincerely yours,

G. F. Todd, Esq., O.D.E., M.A.
