

24th April, 1958.

Dear Professor von Verschuer,

I am afraid I have been a long while getting the enclosed cheque (which is in sterling) for 200 guineas plus 25, which of course you may dispose of as you think best.

Before making a definitive publication on the valuable data which you sent me last month, I wonder if you would permit a colleague of mine, Mr Mason, to visit you in Munster. It will, of course, be necessary to give some account of the method of diagnosis of the monozygotic and dizygotic twin pairs, and to form an idea of the causes of age distribution and other characteristics of the data.

I hope, therefore, that you will permit him, and perhaps Mr Todd also if he is able to go, to visit you and discuss these matters.

Sincerely yours,

Enc.
