

19th February, 1958.

Professor Dr. med. Ehrh. von Verschuer,  
Institut für Humangenetik der  
Universität Münster,  
Baldeyerstrasse 27,  
Münster (Westf.)  
Germany.

Dear Prof. Dr. v. Verschuer,

You will remember that in your letter of 27th March of last year, you informed me that the enquiry into the smoking habits of twins was progressing and that you hoped to let me have the results later in the year. As I have not heard from you since then, I was wondering whether the enquiry was not completed and whether the results had been worked out.

I understand that progress is being made in Italy and in Sweden.

With kind regards.

Yours sincerely,
