15th July, 1957.

Dear Professor Walker,

Many thanks for your note. I am glad to get the two books distinguished. Also, it is good that you are reconsidering the matter of Behrens' solution, which, under the influence of one or two people of the United States, has been actively discredited, with the consequence that no ordinary student in your great country seems to know how to set up a test for a composite hypothesis!

Sincerely yours,
