29th April, 1946.

Dear Dr. Walker,

It is most kind of you to write about my visit to the States, and I very much hope I shall be able to see you and meet your friends of Columbia before going to Raleigh.

Unfortunately I do not yet know my dates of sailing and arrival in New York, nor do I know when this will be available. In order to facilitate arrangements on your side, I shall rely on Dr. Boyd of the School of Public Health, and Dr. Chester Bliss, a former student of the Galton Laboratory, to make me out a time table of visits, so I can give them an idea of what time will be available for the Raleigh meeting.

I am sure, for efficiency, all such arrangements must be made on your side of the water.

Yours sincerely,
