

25th June, 1957.

My dear Geof.,

Ted's news was a bit premature, as, though I hope to visit Australia again before I die, I have no such arrangement for next year. I suspect Alf Cornish and others may be working on it.

You are quite right; association with economics is nearly fatal, and that with mathematics is a grave encumbrance. I should enquire at the M.R.C., giving the names of references, including myself, and also put your views to Frank Yates at Rothamsted.

Sincerely yours,
