
My dear C. B.,

Thank you for your letter, which it was quite delightful to get, and for letting me know of your exploration with the insect fauna of Inverness-shire.

It is particularly angelic of you and Mrs. C. B. to think of getting me up for a short stay with you, for I can imagine nothing more agreeable. I do hope it may be possible next spring or summer, but you must let me know quite exactly when there is a probability of it being convenient from your point of view.

With love to Mrs. C. B.

Yours sincerely,
