Dear Fisher,

I could not get away for lunch on the 5th and thereafter until about 3:30 P.M. to tell you my wife and I were looking and to ask whether there was any way in which we could help you while you were in the country. We were certainly very glad to see you again and only wish Mrs. Fisher could have accompanied you. I do not now expect to go to Washington for the conference. If you get back to the vicinity of Boston please let me know (well in advance if possible) so that I can arrange matters for your entertainment or convenience. You would be welcome to stay with us or our house if that would help you. Also I should be glad to drive you around New England a bit to show you some of our country though there is not much within a dog's drive of Boston which is very striking. However you might
Like to see something of it as a rest.

Do not let us tire you all out. We Americans are such terrible drivers! We have little concept of the need of quiet and reflection for cultural and scientific advance. The Biometric Conference would have been better for having a more leisurely pace in three days, and it would have done its better if held in New Haven instead of whisking you off to Woods Hole between New Haven and Washington engagements. But we have too much around.

Yes, however, have been here often enough to know our way. It was a pleasure to both me and my wife to be in Europe in an pleasant atmosphere for 6 months, and the theme I still remember as one of the highest spots the course of days at Cambridge.

Sincerely,
