Dear Fisher,

As Hammond has a large establishment devoted to statistical work on cancer I send your question to Dr. D. E. Hammond to have it done. He has been working on the same subject for several years and has a large amount of data. He also has a great deal of experience in statistical work on cancer and has made many contributions to the field. He believes it would be easy to find reliable statistical tests for this problem. He also has written extensively on the subject of cancer, and he has made many contributions to the field.

I don't know how long it will take him to do the work, but I am sure that he will be able to do it quickly. He is well known for his ability to work on complex problems and he is capable of producing reliable results.

I hope that this information is helpful to you.

Sincerely,

[Signature]
