# **Communicating Design using 3D Collaborative Virtual Environments and Online Chat**

---

A thesis submitted to The University of Adelaide for the degree of Master of Architecture

by  
Theodor G Wyeld  
October 2007

School of Architecture, Landscape Architecture and Urban Design,  
The University of Adelaide, South Australia.

<b>Contents</b> .....	5
<b>Figures</b> .....	9
<b>Abstract</b> .....	10
<b>Statement of Originality</b> .....	11
<b>Acknowledgements</b> .....	12
<b>Preface</b> .....	13
<b>Chapter 01 Introduction</b> .....	14
1.0 Introduction.....	15
1.1 The Role of Perspective in 3D Virtual Environments.....	15
1.2 Why Investigate the Role of Perspective in 3D Virtual Environments?.....	16
1.3 Contribution to the field.....	17
1.4 Setting.....	17
1.5 Research Question.....	17
1.6 Methodology in Brief.....	18
1.7 Key Outcomes.....	19
1.8 Organisation.....	19
<b>Chapter 02 Literature Review</b> .....	21
2.0 Introduction.....	22
2.1 Perspective in Architecture Practice and Pedagogy.....	24
2.1.1 Perspective in Practice.....	24
2.1.2 Perspective in Pedagogy.....	29
2.1.3 Section Summary.....	31
2.2 Perspective in 3DVEs.....	33
2.2.1 The Role of Perspective in 3D Virtual Environments.....	33
2.2.2 Collaborative Virtual Environments.....	44
2.2.3 The Social Dimension in Remote Collaboration.....	48
2.2.4 Section Summary.....	50
2.3 Chapter Summary.....	52
<b>Chapter 03 Methodology</b> .....	54
3.0 Introduction.....	55
3.1 Research Arena.....	55
3.2 Identifying a Suitable Methodological Approach.....	56
3.2.1 Example Methodologies.....	57
3.3 The Research Approach.....	61
3.3.1 Participant Observation.....	61
3.3.2 Case Study Design.....	61
3.4 To Pursue a Positivist or Constructivist Study?.....	62
3.4.1 Positivism or Constructivism?.....	62
3.4.2 The Problem with Scientific Positivism.....	63
3.4.3 How Constructivism Extends Scientific Discovery.....	66
3.4.4 Constructivism as a Naturalistic Method.....	68
3.5 How the Constructivist Case Studies were Conducted.....	69
3.5.1 The Triangulation Process.....	70
3.5.1.1 Example of Triangulation.....	71
3.6 Measures of Research Quality.....	72
3.6.1 Issues of Data Credibility.....	72
3.6.2 Satisfying the Conditions for a Constructivist Inquiry.....	73
3.7 Summary on why Constructivism was Chosen.....	74
3.8 Tools Used in the Case Studies.....	75
3.8.1 The Pedagogical Benefits of Using Game-Like Exercises as a Motive for Engaging Design Students in Research.....	75
3.8.2 Design and Implementation of the Virtual Games Environments.....	78
3.8.2.1 Justification for using VRML.....	78
3.8.2.2 Justification for using Online Chat.....	82
3.8.3 Summary on Tools Used.....	85
3.9 Chapter Summary.....	86
<b>Chapter 04 Case Studies</b> .....	88
4.0 Introduction.....	89

4.0.1 Overview of Stakeholders.....	89
4.0.1.1 Participants.....	89
4.0.1.2 Anonymity.....	91
4.0.1.3 Researcher Profile.....	91
4.0.2 General Overview of the Case Study Settings.....	92
4.0.3 How to read the Chat dialogues.....	93
4.1 Case 01: Physical versus Virtual Object Assembly.....	95
4.1.1 Introduction.....	95
4.1.2 Why a Federation Villa?.....	95
4.1.3 Pedagogical Aim.....	96
4.1.4 Research Aim.....	96
4.1.5 Setting.....	96
4.1.6 Assessment Criteria.....	97
4.1.7 Method.....	98
4.1.8 Participant's Experiences Recorded in the Chat Logs.....	99
4.1.8.1 The Chat Dialogues.....	99
4.1.8.2 Reflective Dialogue.....	102
4.1.9 Chat Dialogue Analysis.....	103
4.1.9.1 Self-Imposed Rules.....	103
4.1.9.2 Getting Oriented in the Design Space of the Virtual and Physical Environments.....	104
4.1.9.3 Seeing in 3D, Communicating in 2D.....	109
4.1.10 Overall Outcomes.....	110
4.1.10.1 Perspective Related Outcomes.....	110
4.1.10.2 Related to Theories of Perception.....	111
4.1.10.3 Axial Relationships.....	111
4.1.10.4 Related to Perspectival Axes.....	112
4.1.11 On Reflection.....	113
4.1.11.1 Reflecting in the media.....	113
4.1.12 Relationship to Exercises Conducted by Others.....	114
4.1.13 In Summary.....	116
4.2. Case 02: Spatial Boundaries in a Multi-User Virtual World.....	117
4.2.1 Introduction.....	117
4.2.2 Why the Barcelona Pavilion?.....	117
4.2.3 Pedagogical Aim.....	118
4.2.4 Research Aim.....	118
4.2.5 Setting.....	118
4.2.6 Assessment Criteria.....	120
4.2.7 Method.....	120
4.2.8 Analysis of the Hand-Drawn Plans.....	121
4.2.9 Constraints on Navigating the Virtual Barcelona Pavilion.....	124
4.2.10 Participant's Experiences Recorded in the Chat Logs.....	124
4.2.10.1 The Chat Dialogues.....	125
4.2.10.2 Where the 2003 Cohort's Experiences Differed from those of the 2002 Cohort's.....	128
4.2.11 Chat Dialogue Analysis.....	129
4.2.11.1 Gibsonian Affordances Delivered by the 3DVE.....	130
4.2.11.2 Mentally Switching between 2D and 3D Spatial Constructs.....	132
4.2.11.3 Notions of Presence in the 3DVE.....	134
4.2.11.4 'Feeling' the Spaces of the 3DVE.....	135
4.2.11.5 Playing Virtual Hide-and-Seek in the 3DVE.....	137
4.2.11.6 The 3DVE Design Exploration Experience Compared to CAD.....	139
4.2.11.7 How the 2003 Cohort's Experiences Differed from those of the 2002 Cohort's.....	139
4.2.12 Overall Outcomes.....	141
4.2.13 On Reflection.....	141
4.2.14 In Summary.....	142
4.3. Case 03: Shared Interaction with Virtual Objects in a 3D Collaborative Virtual Environment.....	144
4.3.1 Introduction.....	144
4.3.2 Why a Pool House?.....	145
4.3.3 Pedagogical Aim.....	145
4.3.4 Research Aim.....	146
4.3.5 Setting.....	146
4.3.6 Assessment Criteria.....	147
4.3.7 Method.....	148
4.3.7.1 Overview of Process.....	148

4.3.7.2 Summary of Exercise Setting .....	149
4.3.8 Participant's Experiences Recorded in the Chat Logs.....	149
4.3.8.1 Overview of the 2002 Cohort's Experience in the 3DCVE.....	150
4.3.8.2 The Chat Dialogues.....	151
4.3.9 Chat Dialogue Analysis.....	155
4.3.9.1 The View from Above.....	155
4.3.9.2 Notions of Privacy and Transparency in the 3DCVE.....	158
4.3.9.3 Design Moves in the 3DCVE.....	160
4.3.10 Overall Outcomes.....	162
4.3.11 On Reflection.....	163
4.3.12 In Summary.....	164
4.4 Chapter Summary.....	165
<b>Chapter 05 Discussion.....</b>	<b>166</b>
5.0 Introduction.....	167
5.0.1 The Shift in Aim.....	167
5.0.2 Revisiting the Original Aim.....	167
5.1 Perspective Issues.....	169
5.1.1 Introduction.....	169
5.1.2 Adopting the Other's View.....	169
5.1.2.1 The Fallacy of the Privileged Viewing Position.....	169
5.1.2.2 A Personal Vision.....	170
5.1.3 Is Perspective the Designer's Spatial <i>Lingua Franca</i> ?.....	170
5.1.3.1 The View from Above as Flattened Perspective.....	171
5.1.3.2 Communicating 3D Moves Using 2D 'Textual Pictures'.....	172
5.1.3.3 An Innate, Rather than Perspectival, Depth.....	173
5.1.4 Effects and Affect of the Core Perspectival Technology used.....	174
5.1.5 Enumerating the Participant's Various Spatial Realities.....	176
5.1.5.1 Working at the Two-Dimensional Level of the Plan.....	176
5.1.5.2 Experiencing the 'Space' of the 3DVE.....	176
5.1.5.3 A Descriptive or Experiential (or Lived) Space.....	176
5.1.5.4 Flip-Flopping between Two-Dimensional and Three-Dimensional Visualisation.....	177
5.1.5.5 Presence in the 3DVE.....	177
5.1.5.6 A Visionary Space not easily Communicated in the 3DVE.....	177
5.1.5.7 The Social Dimension.....	178
5.1.5.8 A Contracted Spatial Reality when in Hiding.....	178
5.1.5.9 Feelings of Omniscience or Anguish in the 3DVE.....	178
5.1.5.10 Overview of Spatial Realities.....	178
5.1.6 The Ontologically Transparent Construct.....	179
5.1.7 Summary.....	180
5.2 Reframing the Research Question.....	182
5.3 Communication Modes.....	184
5.3.1 Introduction.....	184
5.3.2 Online chat as a Spatial-Concept Communicative Medium.....	184
5.3.3 The Acting Out of Instructions.....	184
5.3.4 Communicating Design Moves.....	186
5.3.5 Aesthetic Considerations.....	187
5.3.6 Summary.....	188
5.4 The Plan Mode.....	189
5.4.1 Introduction.....	189
5.4.2 The 'View from Above' Planning Mode.....	189
5.4.3 Differentiating Between Planning on Paper and in the 3DVE.....	189
5.4.4 The Plan Mode Construct.....	190
5.4.5 Summary.....	191
5.5 Socialisation.....	193
5.5.1 Introduction.....	193
5.5.2 Socialisation in the 3DCVE.....	193
5.5.3 The 3DVE as a Responsive Environment.....	195
5.5.4 Summary.....	195
5.6 Orientation.....	196
5.6.1 Introduction.....	196
5.6.2 Communicating with Text and Objects in the 3DCVE.....	196
5.6.3 The Orientation Construct.....	197
5.6.4 Framing the Orientation Construct.....	197

5.6.5 Summary.....	200
5.7 Pedagogical Issues.....	202
5.7.1 Introduction.....	202
5.7.2 Transformative Outcomes from Case Study 01.....	202
5.7.3 Transformative Outcomes from Case Study 02.....	203
5.7.4 Transformative Outcomes from Case Study 03.....	204
5.7.5 Transformative Outcomes of the Researcher and Participants Alike.....	204
5.7.6 Summary.....	206
5.8 Chapter Summary.....	207
<b>Chapter 06 Conclusion</b> .....	208
6.0 Introduction.....	209
6.1 From the Literature Review.....	209
6.2 In Anticipation of a Dominant Perspective.....	211
6.3 Instead, Plural Spatialities.....	212
6.3.1 Following the Revised Research Question.....	215
6.3.1.1 Plural Communication Modes.....	215
6.3.1.2 Socialisation.....	215
6.3.1.3 Orientation.....	216
6.3.1.4 Pedagogy.....	216
6.3.1.5 Summary.....	217
6.4 In Conclusion.....	217
6.5 Future directions.....	221
6.5.1 Different Settings.....	221
6.5.2 Non-Perspectival Spatial Representation.....	221
6.5.3 Different Approaches to the Same Media.....	222
6.5.4 The Socialising Role of the Avatar.....	222
6.5.5 Spatial Switches in Physical-World Environments.....	222
6.6 Epilogue.....	222
<b>Bibliography</b> .....	224
<b>Appendices</b> .....	255
Appendix A: Chat Logs.....	256
A.1 (2002).....	256
A.2 (2003).....	262
A.3 (2002).....	273
A.4 (2003).....	278
A.5 (2002).....	284
A.6 (2003).....	288
A.7 (2003).....	290
A.8 (2003).....	292
A.9 (2003).....	295
A.10 (2003).....	299

For millennia designers have been using sketches to communicate arrangements of objects in space. Since the Italian Renaissance, in the West, this was formalised as the perspective. Most recently, architects' hand-drafted sketches are increasingly being replaced by 3D computer modelling. The 3D computer-generated perspective extends the humble sketch by adding a photographic realism. Both rely upon the notion that a perspective is perceived intuitively by the lay-person and practitioner alike. While most of the literature reviewed in this thesis extols the virtues of perspective as a medium for communicating spatiality, little mention is made of identifying the role perspective plays in informing *how* perspective communicates spatiality. Its underpinning scientific ontological certainties are generally taken as given. However, whether perspective is how designers actually *see* their design visions is unclear. Moreover, whether designers' familiarity with perspective vision affects how they *choose* to communicate spatiality is equally unclear. As such, this thesis addresses the role of perspective in communicating design. It uses the latest iteration of perspective technology, the real-time 3D virtual environment (3DVE) as a vehicle. A series of pedagogical case studies in the use of 3DVEs is explored. The case studies are founded on exercises with design students as participants. The participants concretise their thoughts in text using online chat whilst exploring various 3DVEs remotely located from each other. The net result of this investigation is that perspective is only one of many methods the participants in this study used for communicating spatiality.

The thesis is structured about six chapters. Chapter 01 introduces the research goals, research question, methodology and thesis structure. Chapter 02 provides a literature review which mounts the case for the ubiquity of an intuitive perspective in design practice and theory since the fifteenth-century Italian Renaissance to contemporary 3D computer modelling. Chapter 03 outlines and justifies the use of a constructivist methodology for teasing out the issues raised in this inquiry. Chapter 04 provides an explorative and detailed analysis of three case studies that all revolve around the role of perspective in communicating spatiality between remotely located design-student participants using online chat to exchange information. Chapter 05 discusses the results of the case studies, providing some preliminary insights. Chapter 06 concludes the thesis. It principally draws upon the literature review and the discussion chapter to provide a conclusive view on the efficacies of perspective in communicating spatiality by the participants of this study.
