THESIS SUMMARY ............................................................................................................................ xv
DECLARATION ................................................................................................................................ xvii
ACKNOWLEDGEMENT ....................................................................................................................... xix

CHAPTER 1: INTRODUCTION ..................................................................................................... 1
  1.1 Research Background............................................................................................................. 1
  1.2 Research Questions .............................................................................................................. 4
  1.3 Research Aims and Objectives ........................................................................................... 5
  1.4 Significance of Research Thesis .......................................................................................... 6
  1.5 Research Scope .................................................................................................................... 9
  1.6 Research Methodology ....................................................................................................... 10
  1.7 Thesis Structure .................................................................................................................. 10
  1.8 Research Timeline .............................................................................................................. 11
  1.9 Research Theoretical Framework ....................................................................................... 11

CHAPTER 2: GENIUS LOCI AND CULTURAL LANDSCAPE INSIGHTS ..................................... 13
  2.1 Introduction .......................................................................................................................... 13
  2.2 Genius Loci: Definition and Understanding ...................................................................... 14
  2.3 The Concept and Theory of Genius Loci ........................................................................... 15
    2.3.1 Theoretical Spirit of Place and Sense of Place............................................................ 15
    2.3.2 Genius Loci and Architecture ...................................................................................... 19
    2.3.3 The Genius Loci Components .................................................................................... 21
  2.4 Genius Loci: History and Precedent .................................................................................... 22
2.4.1  *Genius Loci* in Developed Nations .......................................................... 22  
2.4.2  *Genius Loci* in Developing Countries ....................................................... 23  
2.4.3  *Genius Loci* in the Indonesian Context ..................................................... 24  

2.5  Understanding Cultural Landscape .............................................................. 26  
2.5.1  Culture and Environment ......................................................................... 26  
2.5.2  Landscape Terminology ........................................................................... 29  
2.5.3  Cultural Landscape Definition ................................................................. 30  
2.5.4  Minahasan Landscap Association ............................................................. 32  

2.6  Landscape in Anthropological Views .......................................................... 34  

2.7  Landscape and Ethnoecology .................................................................... 36  

**CHAPTER 3: THE CASE OF MINAHASA** ..................................................... 39  
3.1  A Brief Indonesian Context ...................................................................... 39  
3.2  Indigenous Community in Indonesia ....................................................... 41  
3.3  Indigenous Culture and Development Issues in Indonesia ..................... 43  
3.4  Minahasa Region and Environment .......................................................... 47  
3.4.1  Landscape Features .................................................................................. 49  
3.4.2  Waterflow Patterns .................................................................................. 55  
3.4.3  Natural Resources .................................................................................... 57  
3.5  The Minahasan People ............................................................................ 58  
3.5.1  Origins .................................................................................................... 59  
3.5.2  Classifications and Distributions ............................................................. 64  
3.6  Minahasa History and Evolution ............................................................... 68  
3.6.1  Minahasa during the European Occupation ............................................ 69  
3.6.2  Minahasa during Japanese Occupation to Post Independence ............. 72  
3.7  Indigenous Community, Indigenous Culture and Current Development in Minahasa .......... 73  
3.7.1  The Indigenous Community ................................................................. 73  
3.7.2  Indigenous Culture ................................................................................ 74
5.6.3 Kinilow Village (Kelurahan Kinilow) ................................................................. 122
5.6.4 Wulurma’atus Village (Desa Wulurma’atus) ......................................................... 123
5.6.5 Kakenturan Village (Desa Kakenturan) ............................................................. 125
5.6.6 Tumaratas Village (Desa Tumaratas) ................................................................. 126
5.6.7 Pinabéténgan Village (Desa Pinabéténgan) ....................................................... 128

CHAPTER 6: FIELD SURVEY RESULT AND ANALYSIS ......................................................... 131

6.1 Introduction ............................................................................................................. 131

6.2 Defining Genius Loci in Minahasan Worldview ..................................................... 132

6.3 The micro-analysis of Genius Loci ........................................................................ 133

6.3.1 Tracing the Genius Loci in the Lakeside settings .............................................. 134

6.3.2 Tracing the Genius Loci in the Riverside Settings .......................................... 136

6.3.3 Tracing the Genius Loci in the Mountainside Settings ..................................... 137

6.4 The Tangible Cultural Landscape Components .................................................... 139

6.4.1 Place Identity and Settlement Patterns ............................................................ 139

6.4.1.1 Place Signifier ............................................................................................. 139

6.4.2 Settlement Patterns ......................................................................................... 142

6.4.2.1 Concept in Building a Settlement ............................................................... 148

6.4.2.2 Communal Space ....................................................................................... 153

6.4.3 Sacred Space and Place ................................................................................... 156

6.4.3.1 Dwelling Space .......................................................................................... 157

6.4.3.2 Cultural Perspectives in Building Houses ................................................... 162

6.4.3.3 Traditional Houses ..................................................................................... 170

6.4.4 Sacred Natural Places ...................................................................................... 178

6.4.4.1 Distinctive Reference: the Sacred Stone Watu Pinawétengan .................... 187

6.4.4.2 Rano ni Empung at Mt Empung ................................................................. 195

6.4.4.3 Artefacts and Archaeological Sites ............................................................. 196

6.4.5 Traditional Folk Arts ........................................................................................ 212
6.4.6 Language, Territory and Boundary ................................................................. 216

6.5 Ethnoecology Study .......................................................................................... 218
   6.5.1 Local Traditional Knowledge and Resource Management ......................... 219
   6.5.2 Ethnobotanical Knowledge ......................................................................... 246
      6.5.2.1 Plants for Curative Medicine .............................................................. 246
      6.5.2.2 Plant for Ceremonial Use .................................................................. 251
      6.5.2.3 Plants for Housing Construction ....................................................... 254
      6.5.2.4 Plant for Miscellaneous Use ............................................................... 254
   6.5.3 Hunting and Gathering Traditions ............................................................... 255
   6.5.4 Ecology and Sustainability ....................................................................... 259
      6.5.4.1 Water Resources: Water Holes ......................................................... 261

6.6 The Intangible Cultural Landscape Components ................................................. 263
   6.6.1 Belief and Spiritual Systems ..................................................................... 263
      6.6.1.1 Ancient Belief .................................................................................. 264
      6.6.1.2 Contemporary Rites ......................................................................... 266
      6.6.1.3 Sacred Narratives ............................................................................ 275
      6.6.1.4 Totemic Animals ............................................................................ 279
   6.6.2 Life Cycle, Kinship and Social Tradition .................................................... 283
      6.6.2.1 Spatial Hierarchy Relating to Kinship and Social System ................... 287
   6.6.3 The Sense of Place .................................................................................... 288
      6.6.3.1 Psychological Connection to Places .................................................. 289
      6.6.3.2 Mental Map Orientation .................................................................... 291
      6.6.3.3 Perception to the Spiritual Landscape ............................................... 293
      6.6.3.4 Perception to the Power of Nature and the Wilderness .................... 297

CHAPTER 7: DISCUSSION ...................................................................................... 307

7.1 Defining the Genius Loci of the Minahasa ......................................................... 307
   7.1.1 Genius Loci Interpretation and Issues in the Minahasan Landscape .......... 308
7.1.2 Genius Loci and Minahasan Landscape Connection and Meanings 317
7.1.3 Genius Loci and Environmental Planning 325

7.2 Recommendations 329
7.2.1 Implementation of Genius Loci 329
7.2.2 Conservation of Genius Loci 330
7.2.3 Planning and Management Policy Initiatives 331
7.2.4 Cultural Landscape Management in Indonesia 334

CHAPTER 8: THE CONCLUSIONS 335
8.1 Conclusion 335
8.2 Future Research 338
8.2.1 Pilgrimage 338
8.2.2 Eco-Tourism Planning 338
8.2.3 Traditional Ethnoecological Knowledge 339
8.3 Final Note 340

THESIS SUMMARY

Cultural and geographical landscapes are of major importance in Minahasan life. Minahasa, similar to other regions in Indonesia, has a rich and diverse suite of bio-ecosystems, cultures and ethnic communities. Increasing population growth and development in the Minahasa region in recent decades have, however, resulted in the disappearance of much of the natural landscape as well as deterioration of the distinct culture and traditions of its resident ethnic groups. In order to maintain these socio-cultural and environmental systems, conserving and protecting the natural environment and the culture become important agendas at both regional and national levels. Minahasa has key environmental features and characteristic; hence to overcome this problem requires comprehension of the socio-cultural systems of their society and the development of a holistic environmental-conservation strategy to assist the maintenance of their ethno-ecological relationships. This thesis documents and analyzes the concept of genius loci as it relates to the land occupied by the ethnic groups of Minahasa. The thesis seeks to qualify the contribution of genius loci to better inform landscape and environmental planning systems in the region with the potential of implementation in the Indonesian context. Accordingly, this thesis seeks to examine a different interpretation of genius loci and develop new frameworks to conceptualizing genius loci. The ethnographic research methodology applied in this research seeks to identify, characterize, and compare genius loci and test it through ethnoecology and landscape knowledge systems using selected locations in the Minahasa Region as case studies. The analysis unpacks different ethnoecological information. A range of interview strategies were used in order to gain a deep understanding of the Minahasan cultural landscape components, both tangible and intangible. This thesis interrogated the existence of genius loci and its connection to folklore, memory, sense of place and the identity of the Minahasa and their land. Further, "ethnospecific" ecological-landscape knowledge is documented, and the interactions between the Minahasa and their landscape are compiled and documented. The thesis demonstrates the important role genius loci has in shaping the identity of a community and this region that presently hosts a multi-cultural and multi-religious society, as well as providing an avenue to determine the validity of genius loci as a component of cultural landscape systems. The novelty of approaches in this study can be applied in future analyses of people-place-environment relations using culture as an analysis instrument. It is hoped that the genius loci findings of this research can provide an efficient, innovative and responsive tool to inform ethnic-relevant environmental planning and development in the region and Indonesia.

**Key Words:** Genius Loci, Cultural landscape, Minahasa region, Minahasan, Indonesia, Indigenous culture, Traditional knowledge, Conservation, Sustainability.
DECLARATION

NAME : CYNTHIA ERLITA VIRGIN WUISANG
PROGRAM : PHD IN ARCHITECTURE (LANDSCAPE ARCHITECTURE)

I certify that this work contains no material which has been accepted for the award of any other degree or diploma in my name, in any university or other tertiary institution and, to the best of my knowledge and belief, contains no material previously published or written by other person, except where due reference has been made in the text.

In addition, I certify that no part of this work will, in the future be used in a submission in my name, for any other degree or diploma in any university or other tertiary institution without the prior approval of the University of Adelaide and where applicable, any partner institution responsible for the joint-award of this degree.

I give consent to this copy of my thesis, when deposited in the University Library being made available for loan and photocopying, subject to the provisions of the Copyright Act 1968.

I also give permission for the digital version of my thesis to be made available on the web, via the University’s digital research repository. The library search and also through web search engines, unless permission has been granted by the University to restrict access for a period of time.

SIGNATURE                               DATE: 14 FEBRUARY 2014
DEDICATION

I dedicate this thesis to my family; my loving husband Min Jefry Purnama who is always beside me when I experience distress and patiently supporting me to finish this thesis writing, and to my two precious sons Kevind Timothy Purnama and Ken Phillipo Purnama for their love and companionship, and becoming “my reminder” to boost this thesis to the end.

I also dedicate this thesis to my loving parents for their love, morals, wisdom and prayer support. Thanks to my parents and brother, Edwin Wuisang, for always praying and encouraging me with advice and for visiting me in Adelaide.
ACKNOWLEDGEMENTS

Praise to the Lord Jesus Christ, only by His grace I can finally complete this thesis writing.

In Adelaide, I have had many people involved in making this thesis happen, particularly for research input, advice, information, facilities, services, and materials, as well as financial, technical and moral supports. I express gratitude to:

- My main guideposts on this journey have been provided by the educational people that helped shape this three-and-a-half years study; with countless thanks and sincere heart to my supervisors, both Professor David S Jones and Associate Professor Veronica I Soebarto at The University of Adelaide. After my CCSP Thesis approval, Prof. Jones moved to Deakin University and changed his role from Principal Supervisor to co-supervisor; however, he continued providing me with countless feedback. I cannot thank him enough for his passion and for spending so much time to review this thesis. Without all their dedication, this thesis would have never been completed. I also give thanks to Dr Soehartini Sekartjakrarini (in Indonesia) who acted as external committee member, providing me advices and support;

- I wish to deliver my great thanks to Adelaide Graduate Centre (AGC) for the 3.5 year AGFS Scholarship, particularly to: Professor Richard A Russell, Dean of Graduate Studies; Anne Witt, Director of Adelaide Graduate Centre; Janelle Palmer, Antoinette Brincat, Leanne McBride and others who with this scholarship have benefited me in shaping my study and life towards the conclusion of my thesis. I also thank AGC for the financial support through the Research Travel Grant Award which enabled me to undertake the fieldwork in Indonesia; Dr Cally Guerin, director of HDR Students program; Dr Michelle Picard and Lalitha Velautham, the coordinators of the (IBP-R) International Bridging Program.

- Many thanks to all supporting academia fellows at the School of Architecture and Built Environment who were directly and indirectly involved in my study processes: Professor George Zillante (current Head of School) and Dr Sam Ridgway (former Head of School) for their support in academic processes; Dr Katharine Bartsch (current Postgraduate Coordinator) and also for her advice and other kind support; Dr Peter Scriver and Dr Samer Akkatch (former Postgraduate Coordinators) for their advice in formal and informal discussions; Velice
Wenan (the School Finance Manager); Ian Florance for his technical IT support, Melissa Wilson for her financial arrangement for several international conferences that I attended (in Perth and Sydney); Alison Bosnakis for her help and support in all academic and administrative matters; Sue Fiedler (current student administrator) and Stella Ho (former student administrator); and all lecturers at the school whose have ever talked about and commented on my research topic;

- My sincere gratitude to professional thesis editor, Adam Jarvis for his curiosity with my research dissertation and willingness to work on this thesis editing, also for kind support and for patiently working towards the final draft;

- I give thanks in abundance to University of Adelaide – International Student Centre officers: Patricia Anderson, Dr Ben Candler, Cristine Arant, Alicia Tan and others in supporting all administrative processes of study;

- I wish to also thank Dr Jane Curnow from the Faculty of Humanity and Social Sciences, The University of Adelaide for the discussion we had and for her input on the progress of this thesis, particularly dealing with the massive data analysis; to Vicki McChoy at Student Counselling Support for her advice and counselling and also a letter of support for my study extension;

- My Postgraduate student colleagues at the school: Jessica Huang my room mate, Heather, Vanessa, Isodora, Fahmed, Rhenuma, Tahmina, Lyrian, Martin, Kynda, Zalina, Yanti, Marwa, Namrata, Georgina, Mansoor and others that are not mentioned in this list – many thanks for the formal and informal discussions and kind comments and input on my early thesis draft during Postgraduate seminars, and also thanks for the informal sharing, and on some occasions just having lunch together;

- Thanks to my HDR colleagues at the Humanity and Social Sciences group at IBP-R Program, Adelaide Graduate Centre for their discussion, support, friendship, and lunches;

- I want to thank all my friends: Ps Detlev Vosgerau and his family, and the deacons’ members of Trinity Lutheran Church Pasadena; my Intercession Prayer team: Leely Brett, Marianity Vadoulis, Julie Butterick, Graham Tapp thanks for all material, spiritual and prayer support; the Indonesian Christian congregation whom I was leading their monthly fellowships for two-and-a-half years during my study in Adelaide; and the Trinity Lutheran Church Pasadena community for their fellowship, support and prayers; My sincere heart to Ps Roger Brook at
House International Uniting Church and the English and Indonesian congregation for the fellowship and prayers for my study and family. Thanks in abundance to my fellow Manadonese-Indonesian community for our togetherness and friendship; and other Indonesian students and friends who have ever shared, caught up and talked about my research project;

In Indonesia, I express my appreciation to all the local communities in 16 villages in Minahasa, particularly Elders, farmers, village leaders and cultural activists, for their involvement and participation in interview sessions, particularly to certain people who directly helped me during my first and second fieldwork trips;

❖ It is my pleasure to thank my two assistants Moudy Gerungan and Tammy Maengkom, for their time and energy in becoming interviewers, and Jefry Tumengkol as our team’s driver during the first fieldwork trip; Max Lesar for his information, guidance and acting as translator of Tondano-Tolour language, also as the translator in few documentation of traditional rituals and customs and visitation to some remote places;

❖ I wish to deliver my great thanks and sincere heart to Professor Benny Malonda at Department of Anthropology - Faculty of Social and Political Sciences (FISIP), Sam Ratulangi University for his encouragement, discussion, input and advice for writing this thesis since the earlier draft and also his visit in Adelaide for few days after he attended a conference in Perth in 2011, where I also presented a paper;

❖ Government of North Sulawesi Province, for the financial support for my local trips in Minahasa;

❖ My heart felt gratitude to all tour guides from each village: James Sumeke (Ro’ong village) and Relly Boyoh, for guiding us to visit and entering a cave in Uluna,Tondano; Rommy Raturandang (Tolour village) for taking us on the boat to the Tondano Lake; Jelly Roeroe (Watumea village) for his accompaniment in some interviews; Lenny Malonda (Telap village) for sheltering and feeding us in her place; Betty Maengkom for sheltering and feeding us at Pélélo’an village; Maxi Montahu and family for their house and hospitality in Pulutan village; My own family in Lininga’an for letting me use their house as my base camp during my fieldwork; Yoppy Tumengkol (Kembu’an village) for his guided tours to some remote places in the jungle, and the Tumengkol family’s house as my base camp during my visit; Ria Kaunang (Tanggari village-Pala Jaga VI) for her help, food and guidance to visit respondents’ houses;
the family of the Village leader in Makalonsouw for their hospitality and food; James Guco (Rurukan Village) for his tour guiding and accompaniment when visiting some respondents’ houses; Ibu Deitje and Bpk Ronny (Kinilow government officers) for their accompaniment during interviews; Kumendong family at Wulurma’atus/Maka’aroyen for their food, hospitality and accomodation; Rudi Pai and family (The Village Leader of Tumaratas) for their food, hospitality and accomodation; Novie Porajouw (Head of Pinabéťengan village) and family for their hospitality and food, Lempoy Family (Riri and Titi) for their hospitality, food and allowing me to use their house as my base camp during my visit in Pinabéťengan over 3 weeks;

Many thanks to Institute Seni dan Budaya Sulawesi Utara and their officers in assisting with important books for research, documentation of their annual cultural event; Dr Benny Mamoto, Dr Theo Lasut, Masyarakat Adat Tontemboan and others; Arie Ratumbanua, the custodian at Watu Pinawetengan for our long conversations, discussions, and hospitality;

Thank you to the blind peer referees who have reviewed the following articles and conference papers that have progressively reviewed and critiqued research work in progress, noting that none of the refereed text is used in the dissertation:

- And last but not least, thank you to all my extended family and relatives in Manado, Jakarta, Tangerang, Depok, Tondano, and Palu) for their constant support.
