REC. 6-12-27

AUSTRALIAN FORESTRY SCHOOL.

From reports received from the standing committee on Empire forestry in London, there is every indication that the conference of Empire foresters in Australia in 1928 will prove fully as successful as former conferences held in London (1920) and in Canada (1923). In May of this year, at a meeting of Governors and administrative officers of colonies, convened by the Colonial Office in London, the importance of the Australian conference was discussed, and the necessity stressed of full support from the other dominions and colonies. The itinerary and general programme as approved by the standing committee in London is as follows:—Conference to begin in Perth during first week in September, 1928; six weeks to be spent in Australia (three days in each State), and the main conference (lasting a week) to be held at Canberra. Thereafter, the delegates will leave Australia for a fortnight's tour in New Zealand. One public function is to be held in each State for the purpose of welcoming the Empire delegates. The Australian secretary to the conference is Mr. A. R. Australian Forestry School, Canberra, and it is expected that the British secretary will arrive in Australia two months in advance of the main conference to assist in detailed arrangements of itinerary, &c.
