

**SEDIMENTOLOGY AND MINERALOGY OF SOME
JURASSIC-CRETACEOUS SEDIMENTS OF THE
SOUTHERN EROMANGA BASIN**

by **TANH VAN DOAN, BSc.**

awarded 11.4.90

This thesis is the result of research undertaken submitted by the author in part fulfillment of the requirement for the Master of Science Degree in the University of Adelaide 1988.

STATEMENT

This thesis contains no material which has been accepted for the award of any other degree of diploma in any University, and, to the best of the author's knowledge and belief, it contains no material previously published or written by another person, except when due reference is made in the text. I consent to this thesis being made available for photocopying and loan by the librarian of the University of Adelaide upon acceptance of the degree.

TANH VAN DOAN

CONTENTS

	Page
CHAPTER 1 INTRODUCTION	1
1.1. LOCATION OF THE AREA	1
1.2. AIMS OF STUDY	1
1.3. PREVIOUS WORK	2
CHAPTER 2 REGIONAL GEOLOGY	3
2.1. STRATIGRAPHY	3
2.1.1. Pre-Mesozoic Basement	4
2.1.2. Mesozoic sediments	4
2.1.2.1. ALGEBUCKINA SANDSTONE	4
2.1.2.2. CADNA-OWIE FORMATION	5
2.1.2.3. BULLDOG SHALE	5
2.1.2.4. OODNADATTA FORMATION	6
2.2. REGIONAL STRUCTURAL GEOLOGY	7
CHAPTER 3. LITHOFACIES DESCRIPTION	8
3.1. INTRODUCTION	
3.2. STUART CREEK OPAL FIELD SECTIONS	8
3.2.1. Stuart Creek Beds	8
3.2.2. Bulldog Shale (Marree Formation equivalent)	9
3.3. PELICAN WELL SECTIONS	9
3.3.1. Pelican Well Formation	10
3.3.2. Trinity Well Sandstone	10
3.3.3. Marree Formation	11
3.4. TRINITY WELL SECTIONS	11
3.4.1. Pelican Well Formation	11
3.4.2. Trinity Well Sandstone	12
3.4.3. Marree Formation	13

CHAPTER 4 SCANNING ELECTRON MICROSCOPY OF QUARTZ SAND SURFACE TEXTURES 14

4.1. INTRODUCTION	14
4.2. PREVIOUS WORK	14
4.3. SCANNING ELECTRON MICROSCOPE METHODS	15
4.3.1. Method and sample preparation	15
4.3.2. Interpretation of quartz sand grains	15
4.4. SUMMARY OF QUARTZ SAND SURFACE TEXTURES	16
4.4.1. Conchoidal fracture patterns	16
4.4.2. Upturned cleavage plates	17
4.4.3. V-shaped patterns	17
4.5. CRITERIA FOR VARIOUS ENVIRONMENTS	18
4.5.1. Source materials	18
4.5.2. Diagenetic features	19
4.5.3. Glacial environment	20
4.5.4. Littoral environment	20
4.5.5. Aeolian environment	21
4.5.6. Combined environment	21
4.5.6.1. GLACIAL AND SUBAQUEOUS COMBINED	21
4.5.6.2. SUBAQUEOUS AND AEOLIAN COMBINED	22
4.6. RESULT OF QUARTZ SAND SURFACE TEXTURES IN THIS STUDY	
4.7. STATISTICAL ANALYSIS	23
4.8. SUMMARY AND DISCUSSION	25

CHAPTER 5 DIAGENESIS 27

5.1 INTRODUCTION	27
5.2 AIM OF DIAGENETIC STUDY	28
5.3. MINERALOGICAL STUDIES	28
5.3.1 QUARTZ	28
5.3.2. AUTHIGENIC FELDSPAR	29
5.3.2.1. Introduction	29
5.3.2.2. Occurrence	29
5.3.2.3. Development	30
5.3.2.4. Chemistry	30
5.3.2.5. Formation	31

5.3.3. KAOLINITE	32
5.3.3.1. Introduction	32
5.3.3.2. Occurrence of kaolinite	32
5.3.3.3. Chemistry	33
5.3.3.4. Formation	34
5.3.4. SMECTITE/ILLITE	34
5.3.4.1. Introduction	34
5.3.4.2. Occurrence	35
5.3.4.3. Chemistry	35
5.3.4.4. Formation	36
5.3.5. ZEOLITE	36
5.3.5.1. Introduction	36
5.3.5.2. Occurrence	36
5.3.5.3. Chemistry	37
5.3.5.4. Formation	37
5.3.6. GLENDONITE	39
5.3.6.1. Introduction	39
5.3.6.2. Previous studies	39
5.3.6.3. Occurrence	40
5.3.6.4. Morphological studies	40
5.3.6.5. Formation of glendonite	41
5.3.7. PYRITE	42
5.3.7.1. Introduction	42
5.3.7.2. Occurrence of pyrite	42
5.3.7.3. Formation of pyrite	43
5.3.8. GLAUCONITE	44
5.3.8.1. Introduction	44
5.3.8.2. Occurrence of glauconite	44
5.3.8.3. Formation of glauconite	45
5.3.9. GYPSUM	45
5.3.9.1. Introduction	45
5.3.9.2. Occurrence of gypsum	45
5.3.9.3. Formation of gypsum	45
5.3.10. MINOR COMPONENTS	46
5.4. DISCUSSION AND CONCLUSION	47

CHAPTER 6 ENVIRONMENT INTERPRETATION 51

6.1. ALGEBUCKINA SANDSTONE (VILLAGE WELL FORMATION EQUIVALENT	51
6.2. CADNA-OWIE FORMATION (PELICAN WELL FORMATION EQUIVALENT	52
6.3. BULLDOG SHALE	53
6.4. ENVIRONMENTAL INTERPRETATION	54
6.4.1. Possible transport mechanism of the sediments	54
6.4.2. Evidence of cold climate and ice rafted sediments in the Cretaceous	55
6.4.3. Ice rafted in the southern Eromanga Basin	56

CHAPTER 7 CONCLUSION 59

Acknowledgements

I am indebted to my supervisors, Professor L.A. Frakes and Dr J.B. Jones of the Department of Geology and Geophysics for their helpful advice and discussion during the course of my research, and for their constructive criticisms, encouragement and interest.

Nick, Jane and Neville assisted me during extended field studies and provided valuable discussion and debate.

Other staff member Drs R.A.Both, V.A. Gostin, B. McGowran and R. Oliver also gave advice and encouragement to me in many aspects of my studies and thesis preparation.

I extend my appreciation and thanks to all other technical staff and fellow research students of the Department of Geology and Geophysics; Wayne, Geof, Rick, Evert, John, Christine and others.

I am grateful to Australia which gave me the opportunity to live and study in this country, my brothers and sisters for their support, and finally my wife Phung and daughter Thuan for their helpful companionship, endurance and patience during the preparation of this thesis.
